Help to upkeep CSU's three mini urban farms in South LA. [CSU](#) is a powerful health and food justice organization, whose mission is to foster the creation of communities actively working to address the inequalities and systemic barriers that make sustainable communities and self-reliant life-styles unattainable. They are committed to supporting and creating justice-driven community-based programs and educational initiatives. For new volunteers, the first half hour will consist of an orientation, during which we will familiarize you with what we do, the location you are working, and how your efforts connect to our vision for a local food system in South LA.
